

TSI's Website

The Federal Transit Administration, through the Transportation Safety Institute (TSI), Transit Safety and Security Division, offers a variety of safety and security training for the transit industry. To view all available transit safety and security training and the latest training schedule, go to TSI's website, transit section:

www.tsi.dot.gov

Registration

There are three ways to register for a TSI class: online, fax, or mail. See TSI's website for more information regarding registration.

Transit Explosives Incident Management Seminar

Transportation Safety Institute

Transit Explosives Incident Management Seminar

Course Elements

- Threat identification
- Explosive components recognition
- Improvised explosive devices
- Explosive Incident Management Plan development
- Threat management
- Search procedures in the transit environment
- Incident command system and coordination of response efforts and resources (NIMS/NRP)
- Hardening the target
- Presentation from local police department bomb technician

Course Overview

This seminar demonstrates how to prepare for and initially respond to acts of terrorism involving explosives, how to implement a plan and procedures to respond to an explosive incident, and how to manage an incident and the media. Participants are trained in general security awareness in the transit environment and how to identify flaws in facility or vehicle design and discourage criminal activity. Two seminars are conducted at the host site on the afternoon of the first day and on the morning of the next day to encourage agency participation.
